

STARTING ARTS SUMMER FILM CAMP
PRESENTS

Singularity

SPONSORSHIP & DONATION OPPORTUNITIES

What is "Singularity"?

The Story: "Singularity" is an original children's short film spotlighting 6-12th grade acting and film production talent. This first-of-its-kind production is set to be produced as part of the Starting Arts summer film camp pilot project, taking place July 21-August 8, 2008 and hosted at Wilcox High School in Santa Clara, California.

The Camp: Taught and produced by trained film professionals James Fox, Owner/Director, Dawnrunner Productions and Geoff Peck, Director of Photography, Dawnrunner Productions, the Starting Arts summer film camp will educate students in advanced film-making techniques and on-camera acting. The key production and shooting days of the "Singularity" film will take place during camp hours enabling exciting & informative hands-on instruction on a true-to-life film set.

The Premiere: The film camp arts program will culminate at a premiere gala event on September 16 to showcase the completed film and celebrate the young actors & actresses. Everyone is welcome to purchase tickets and attend the showing.

Get Involved & Help Make "Singularity" a Success!

All Donations are tax-deductible.

The "Singularity" film camp pilot project needs your help, whether monetary, service, or materials. Your donations help ensure that "Singularity" film camp can continue and that participants receive quality production sets, costumes, training and more.

Starting Arts receives and solicits operating funds from individuals, corporations, foundations and government agencies. Monies are primarily spent on artist salaries, teaching supplies and technical support. We are prepared to accept a variety of contributions, i.e. cash, stock, capital goods and/or services.

Sponsorship packages: To help incent you to donate to the "Singularity" film camp today, we've put together a few sponsorship packages & suggested donations. Contributors not only help educate the next generation of artists and audiences - they help teach creative thinking skills to the future innovators and leaders of our world.
